Round 1 Penalty Calculation

1. Points are calculated from taking the placings from the class and then ranking them 1 to 15, points have then been applied with 1 point more than the amount of starters in the team competition.
2. Individual scores have been added together (with one drop score) to get a team total. The difference from the leading teams points has then been multiplied by the coefficient 0.50.
3. Fractions have then been rounded down
